

PROFILE

I am a software engineering student with a passion for creating websites and exploring the backend of web development.

I am currently focused on enhancing my skills in website development, particularly in React.js. My aim is to become a professional website developer in the future. I am dedicated to continuous learning and improvement, allocating daily time to expand my knowledge and abilities in this domain. With a consistent and progressive approach, I am steadily advancing towards my goal of becoming a professional MERN stack developer.
